

DID YOU KNOW?

1

Some personal medications - antibiotics, chemotherapy medicines, etc - can upset the bacterial balance, the storage capacity and block leach drains in your septic system.

Solution

- ✦ **Pour 60mL** concentrate of Bio-Zyme Industrial **daily** down any drain, and continue for **10 days** after conclusion of medication.

2

In most of the cases blocked drain is caused by accumulation of matters such as fat, and remainder food throughout the pipe. This can be easily solved by using Bio-Zyme products.

Solution

- ✦ **Pour 100mL** concentrate of Bio-Zyme Industrial down the drain. **Wait 1 hour**, then repeat the process.
- ✦ Bio-Zyme Industrial is an enzyme based deodoriser and degreaser. It is designed to efficiently break down grease and fat.
- ✦ If drain doesn't unblock, then call your plumber - maybe the problem is with seals and pipework.

TOILET CLEANER

Bio-Zyme INCistern for Toilet Cistern

- ✦ Cleans the toilet bowl and waste drains on every flush.
- ✦ Install bracket inside the cistern for a better result.

GENERAL TIPS

- ✦ Powder and Liquid are preferable products for use in dishwashers.
- ✦ **Do not** flush the following items or blockages **will occur**: wet wipes and sanitary products
- ✦ Use Bio-Zyme regularly to maintain and eliminate blockages with Macerator pumps, drip lines and drains.

 Drain Cleaner	 Replace with Bio-Zyme Cleaner & Industrial They digest contaminants and speed up the biodegrading process.	
 Bleach Products	 Replace with Plant based products Diluted plant based washing products reduce the need for bleaching agents.	

BIO-ZYME INSTRUCTIONS

Bio-Zyme Cleaner for all Domestic Uses

Where to use

-  On all washable surfaces in and around the home, including; bathrooms, kitchens, drains, walls, floors, carpets, cars, boats, sports equipment, pet enclosures.

Best tools to use

-  Foam application is key to increase the product contact time on the surface. Foam sits - no run off - which allows more effective cleaning.

How to use

-  Bio-Zyme Cleaner is a concentrated product - Use just 4 tablespoons (60mL) to a litre of warm or cold water for all cleaning.
-  Foam and agitate with brush or cloth. Rinse, wipe or hose off (brush is effective to clean where the dirt normally gets trapped e.g. drains, plug holes, taps).

Shock Dosing

Maintenance: after initial set up and scheduled empty of wastewater treatment system (septic) and for smelly drains:

-  Pour 2L of Bio-Zyme Industrial down the furthest internal drain - being toilet, shower or basin. Then, flush or run 1L of water down to disperse product into drain.

If following Bio-Zyme Instructions

Shock Dose
100mL
Monthly
into drain

If using traditional Products

Shock Dose
500mL
Weekly
into drain
