

YOUR NEW ZEALAND MANUFACTURED ORGANIC SOLUTION
TO A CLEAN GREEN ENVIRONMENT

MotorHomes | Caravans

Portable - Cassette Toilet

Where & How to use our Products

Problems

One of the biggest problems facing this industry is the uses of strong chemicals, that are toxic, to disinfect and mask the wastewater effluent odours, rather than help to decompose naturally.

Use **Bio-Zyme** through one of our foamers.

Bio-Zyme is a **high performance**, non-toxic, non-allergenic and **readily biodegradable** multiple enzyme degreaser, odour controller, **cleaner/sanitiser*** (*only under MPI Approvals). **Environmentally & wastewater treatment systems preferable.** Laboratory tested - ask us about our test results, available on request.

Solutions

Bio-Zyme Industrial

Industrial - C32

- Small additions into the storage water will help degrade and deodorise the waste for acceptable disposal to sewer.
- For all portable/cassette toilets** ensure 60mL of Bio-Zyme Industrial is added into the initial water charge of 500ml. This is repeated after each empty of cassette. This will be enough to last over 2 weeks of heavy use. Do not add any other chemicals.

Bio-Zyme Cleaner

Cleaner - C32

- For general cleaning** of the interior of motor homes/caravans, use 60ml of Bio-Zyme cleaner per litre of water. This will help odours in grey water tank also.*
- For all washing of the exterior** of motor homes/caravans, use 60ml of Bio-Zyme Cleaner per litre of water.
- Bio-Zyme is safe to use on grass or gravel areas on property. This ensures storm water drains are used for what they are intended; **only rain water.**

* Use for general cleaning including bench, table, toilet, shower, carpet, upholstery, floor, barbecues.
