

YOUR NEW ZEALAND MANUFACTURED ORGANIC SOLUTION
TO A CLEAN GREEN ENVIRONMENT

Domestic Use

For urban area & wastewater treatment systems

Where & How to use our Products

Problems

Septic tanks sometimes become smelly and ineffective because of the overuse of strong cleaning products in the home.

Some personal medications can upset the bacterial balance in the septic system by overloading the storage capacity and blocking leach drains.

Bio-Zyme Cleaner

Cleaner - C32

Wide range of applications in and around the house

**Shower | Toilets | Basins | Floor | Carpets
Upholstery | Concrete | Tiles | Stainless steel**

- Use Bio-Zyme Cleaner for all household cleaning at 60mL per 1 litre of water. Spray and wipe as normal.
- Use Bio-Zyme INCistern Toilet Bowl Cleaner. It attaches to inside of cistern & requires no batteries - approx. 400 flushes.
- Use Bio-Zyme Cleaner for vehicle and boat cleaning at 60mL per 1 litre of water.
- Carpet spot cleaning - spray 60mL per litre of water on surface of carpet and dry off with clean cloth.

Bio-Zyme is endorsed by the leading manufacturers and installers of wastewater treatment systems and septic tanks in New Zealand.

- Chlorine and quat based cleaning products are **not** user friendly in wastewater treatment systems and septic tanks.

Bio-Zyme is a **high performance**, non-toxic, non-allergenic and **readily biodegradable** multiple enzyme degreaser, odour controller, **cleaner/sanitiser*** (*only under MPI Approvals). **Environmentally & wastewater treatment systems preferable.** Laboratory tested - ask us about our test results, available on request.

Solutions

Adding Bio-Zyme speeds up the digestion of waste solids, allowing natural bacteria to solubilise and break down. By breaking down the solids the flow through the field drains is clearer and cleaner, so odour-free waste can pass freely into the septic tank field and be absorbed by the soil without ponding, which help prevents ground water pollution.

Bio-Zyme Industrial

Industrial - C32

Kick Starting the Septic Tank

- Flush 1 litre of Bio-Zyme Industrial down the toilet or directly into septic tank after it has been cleaned out to kick start the process.
- Weekly flush 200mL down toilet/drain.
- Use Bio-Zyme Industrial for any blockages.
